1. System Overview

Purpose

The Rural Development Management System (RDMS) is a centralized web-based application designed to streamline and organize rural welfare and development activities. It serves as a complete digital solution for managing beneficiaries, donors, projects, aid distribution, and volunteer activities.

Key Benefits

- Centralized data management - eliminates scattered spreadsheets
- Improved transparency and accountability
- Secure access with role-based authentication
- Real-time analytics and reporting capabilities
- Efficient resource allocation and tracking

2. Pre-Demonstration Setup

Requirements

- XAMPP running with Apache and MySQL active
- Browser with JavaScript enabled (Chrome, Firefox, or Safari)
- System URL: <http://localhost/RDMS/>

Test Credentials

Admin	admin	password123
Manager	manager1	password123
Field Worker	field_worker_1	password123

3. Login & Authentication Demo

Steps

12. Open browser and navigate to <http://localhost/RDMS/>
13. Display the login form (light blue background with RDMS branding)
14. Demonstrate incorrect login attempt - enter wrong credentials
15. Show error message: 'Invalid username or password'
16. Log in with Admin credentials (admin / password123)
17. Explain session creation and security features
18. Note: Automatic logout after 30 minutes of inactivity

4. Dashboard Walkthrough

Key Components

- Total Beneficiaries - displays active beneficiary count
- Total Donations - shows cumulative donation amount
- Active Projects - displays number of ongoing projects
- Volunteers Registered - shows volunteer count
- Distribution History - recent aid distribution logs

Demonstration

19. Point out navigation menu on left sidebar
20. Explain dashboard metrics update in real-time
21. Highlight quick access links to major modules
22. Show logout option in top right corner

5. Beneficiary Management Demo

Demonstration Steps

23. Click 'Beneficiaries' from the main menu
24. Show list of existing beneficiaries with all records
25. Click 'Add New Beneficiary' button
26. Fill in sample form fields:
 - Full Name, CNIC, Contact Information
 - Address, City, Province
 - Family Size, Income Status
27. Submit the form and show success message
28. Verify new record appears in beneficiary list
29. Demonstrate edit functionality - modify an entry
30. Show delete functionality with confirmation prompt

6. Donor & Donation Tracking

Donor Management

31. Navigate to 'Donors' module
32. Display list of registered donors with contact information
33. Demonstrate adding a new donor
34. Show donor profile with donation history

Donation Recording

35. Click 'Donations' module
36. View donation transaction log
37. Record new donation - select donor and amount
38. Assign donation to specific project/aid distribution
39. Show donation receipt/confirmation

7. Project Management

Project Overview

40. Open 'Projects' from navigation menu
41. View all active development projects
42. Show project details page with:
 - Project name and description
 - Budget allocation
 - Start date and estimated completion
 - Progress status and completion percentage

Creating New Project

43. Click 'Create Project' button
44. Fill in project details form
45. Submit and confirm record creation

8. Aid Distribution Process

Distribution Workflow

46. Navigate to 'Aid Distribution' module
47. View distribution records with dates and amounts
48. Record new distribution:
 - Select beneficiary from dropdown
 - Choose aid type (food, medical, educational, etc.)
 - Enter distribution amount
 - Add notes and distribution date
49. Submit distribution form
50. Generate distribution receipt
51. Show updated beneficiary aid history

9. Volunteer Management

Volunteer Registration

52. Click 'Volunteers' in main menu
53. Display list of registered volunteers
54. Add new volunteer:
 - Full name, contact information
 - Availability and skills
 - Project assignment

Activity Tracking

55. View volunteer activity logs
56. Log volunteer assignments and completion
57. Generate volunteer performance reports

10. Reports & Analytics

Available Reports

58. Navigate to 'Reports' module
59. Show beneficiary summary report
60. Display donation analytics
61. Generate project progress report
62. Show aid distribution trends
63. Volunteer activity summary

Report Features

- Filter by date range
- Export to PDF or Excel
- Visual charts and graphs
- Print functionality

11. Conclusion & Q&A

Key Takeaways

The RDMS provides a comprehensive, user-friendly solution for managing all aspects of rural development operations. The system integrates multiple modules seamlessly to provide:

- Complete data centralization
- Enhanced operational efficiency
- Improved transparency and accountability
- Real-time insights through analytics
- Secure access control with role-based permissions

Support & Maintenance

The system is built on industry-standard technologies (PHP, MySQL) and can be easily maintained and extended. Technical documentation and database schema are available for future enhancements.

Questions & Discussion

Thank you for the demonstration. We are now open for questions, feedback, and discussion about the system's features and capabilities.
